KNOT KLIPPER AXES

"The Cost Is in the Inside Quality"

All Knot Klipper Brand Axes are bi-metallic (that is, two piece axes). There are no substitutes for these extra quality axes manufactured from the best grade steel under careful supervision and inspection.

The Warranty Tag, attached to each axe, is our guarantee to you against any defect in manufacture. For many years the Knot Klipper Axe has been a best seller nationally. On the basis of tests and sales our Knot Klipper Axes have proven to be most satisfactory tools for industrial, timber, and home use.

MANN'S LIGHT WEIGHT AXES

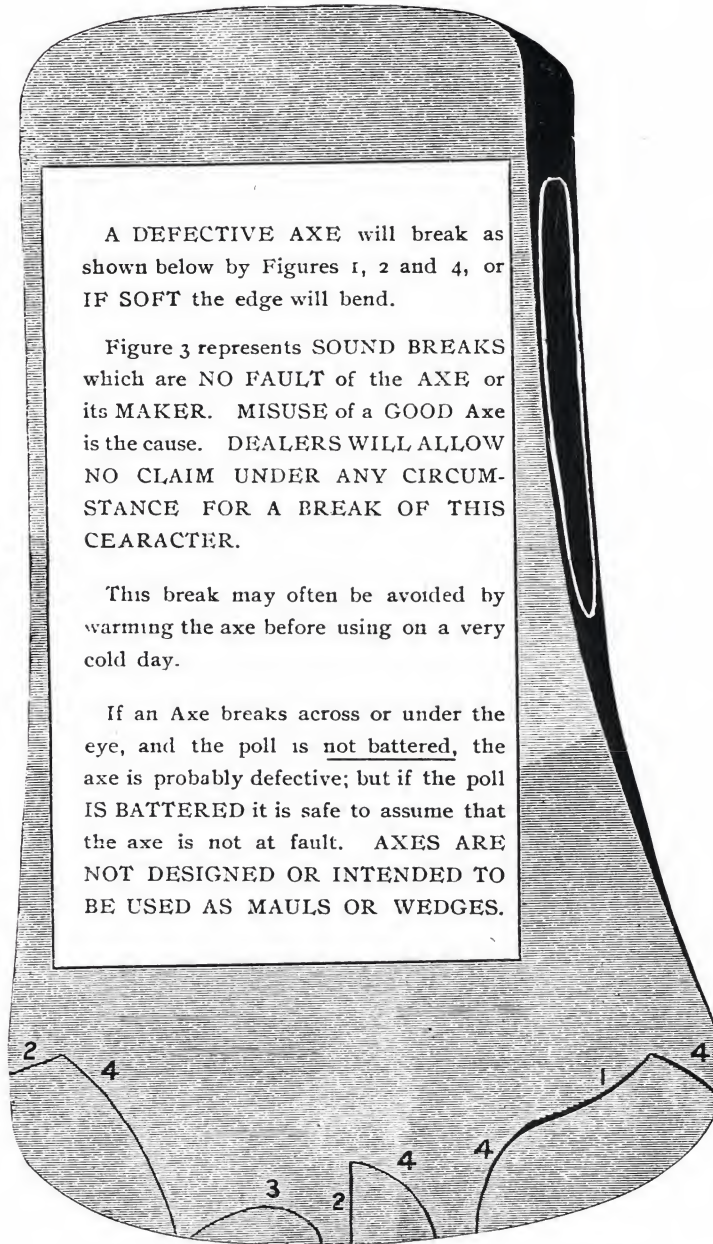

DEFECTIVE AXES

A DEFECTIVE AXE will break as shown below by Figures 1, 2 and 4, or IF SOFT the edge will bend.

Figure 3 represents SOUND BREAKS which are NO FAULT of the AXE or its MAKER. MISUSE of a GOOD Axe is the cause. DEALERS WILL ALLOW NO CLAIM UNDER ANY CIRCUMSTANCE FOR A BREAK OF THIS CHARACTER.

This break may often be avoided by warming the axe before using on a very cold day.

If an Axe breaks across or under the eye, and the poll is not battered, the axe is probably defective; but if the poll IS BATTERED it is safe to assume that the axe is not at fault. AXES ARE NOT DESIGNED OR INTENDED TO BE USED AS MAULS OR WEDGES.
